- **ISO/IEC 17020:2012**

Where TES is Taking Clients Next

COMPLIANCE OPERATIONS

Powered by Stratus GRC-ITSM

One System of Record. GRC, ConMon and ITSM in one FedRAMP 20x certified platform.

Rev 5 and 20x Built In. KSI pipelines, POA&M, inventory and ongoing certification reports from live tickets.

Run by TES. White-glove onboarding, configuration and first-line support.

POST-QUANTUM RESILIENCE

Powered by SandboxAQ AQtive Guard

Cryptographic Discovery. Every certificate, key and library inventoried across the environment.

PQC Mapped. Assessed against NIST post-quantum standards and DoW CNSA 2.0; 2030 and 2031 deadlines in view.

Migration Roadmap. Prioritized remediation, delivered by an authorized AQtive Guard integrator.

AI & QUANTUM ADVISORY

TES Emerging Technology Practice

AI Enablement and Integration. Secure adoption inside compliant boundaries, from use-case selection to deployment.

AI Compliance. Governance, risk and control mapping for NIST AI RMF and federal AI directives.

Quantum Strategy Advisory. Executive roadmaps that sequence PQC, workforce and vendor readiness.

TES CONSULTANTS OFFERING

Stratus GRC-ITSM

FedRAMP compliance operations and IT service management in one system of record.

An ITSM runs operations but has no compliance model. A GRC tool tracks compliance but hands the work to someone else's ticketing system. Stratus GRC-ITSM is both in one platform, so every change, incident and access request carries its FedRAMP evidence with it, and TES Consultants runs it for you.

FedRAMP Rev 5 and 20x Built In. Low, Moderate and High baselines, KSI pipelines, RMF ATO, CMMC L1 to L3, and DoD IL2 to IL5 mapped to the same tickets.

ConMon on Autopilot. POA&M, asset inventory, vulnerability deviations, Security Inbox and quarterly Ongoing Certification Reports from live operations.

A Real Service Desk. Change with CAB routing, incident with after-action reports, access requests with recertification, self-service portal.

Delivered White-Glove by TES. Onboarding, framework configuration, ConMon operations and first-line support from the TES team, not a vendor help desk.

FedRAMP 20x

TES CONSULTANTS OFFERING

SandboxAQ: PQR & PQC

Post-Quantum Resilience and Cryptography, powered by AQtive Guard.

Federal systems run on encryption nobody has fully inventoried. AQtive Guard, SandboxAQ's platform, finds every certificate, key, and cryptographic library across an environment, and TES Consultants runs the readiness program around what it finds.

Automated Discovery. Every certificate, key, and cryptographic library inventoried across the environment, continuously.

PQC Mapped. Assets assessed against NIST post-quantum standards and the DoW's CNSA 2.0 requirement.

Migration Roadmap. Prioritized remediation scoped to mission-critical systems first.

Delivered by TES. TES Consultants manages onboarding, configuration, and readiness reporting, not a vendor black box.

FY 2030

DoW SYSTEMS MUST SUPPORT
PQC OR BE PHASED OUT

FY 2031

ALL DoW SYSTEMS MUST USE
PQC

CNSA 2.0

REQUIRED FOR NATIONAL
SECURITY SYSTEMS
